I am urging you to add the Coquille Point as a Marine Garden/Education Area.
As you know visitors come to this Bandon area to see and experience the seabird nesting habitat and harbor seal pupping sites, as well as being a scenic destination for tourism.
I have been to the site numerous times and have seen that the reaction of wildlife to free running dogs. If there was such a designation as a Marine Garden, education would help the public understand that this site was a precious resource that should be protected.

Sincerely,

Tim Land
