

Yaquina Bay Collaborative Monitoring Platform

- Permanent monitoring station located at Dock 5.
- Funded by Oregon Sea Grant. Maintained by NANOOS.
- Primary Function
 - Send salinity and temperature data to NVS at 30 minute intervals. (nvs.nanoos.org/Seacast)
- Secondary Function
 - Test bed for instruments in beta.
- Regularly maintained by OSU personnel.

Yaquina Bay Collaborative Monitoring Platform

- Development of new and low cost sensors/research is key in addressing OAH.
- Opportunities
 - Addition of OAH-relevant sensors to platform.
 - Test bed for new sensors.
 - Two open instruments slots for data telemetry.
