Re: Proposed Fiscal Year 2019 President's Budget

Dear Governor Brown,

At its April 26, 2018 meeting, the Oregon Ocean Policy Advisory Council (OPAC) received a brief update on the proposed federal budget for Fiscal Year 2019 and its potential impacts to the Oregon Coastal Management Program and the Oregon Sea Grant Program. In furtherance of our statutory duty to offer advice to your office, as well as to state agencies and local governments, OPAC provides the following general description of these programs and their importance to Oregon and our coastal communities. OPAC unanimously supports these programs and encourages you to seek continued funding for them in the federal budget for Fiscal Year 2019.

Oregon Coastal Management Program

Created by the Coastal Zone Management Act (CZMA), the National Coastal Management Program is a state-federal partnership that leverages federal funds in furtherance of coastal community goals, including economic development, enhancement of public access and recreation, and protection of coastal resources through the effective management of the states' coastal zones. In Oregon, the Oregon Coastal Management Program (OCMP) receives federal CZMA funds via the National Oceanic and Atmospheric Administration (NOAA). That funding supports 11 positions that in turn provides technical and grant assistance to municipalities, local, and regional groups to do a range of work such as reduce risk from coastal hazards and help communities keep their comprehensive land use plans and estuary plans up-to-date.

The president's proposed federal budget for Fiscal Year 2019 zeroes out all NOAA Coastal Management grant funds. If this occurs, the OCMP would no longer have the capacity to serve the 32 cities and 7 counties in Oregon's coastal zone, the state agencies in Oregon's networked Coastal Program, the Ocean Policy Advisory Council, the Lower Columbia Solutions Group (addressing Columbia River sediment management), ports, nonprofit environmental groups, environmental consultants, and Oregon's citizens that benefit from effective management of the coastal zone.

Oregon Sea Grant Program

Using a non-regulatory approach based on competitive, peer-reviewed, sound science and technology, the Sea Grant College Program supports state and local decision makers as they address challenges facing coastal communities. Nationally, Sea Grant Programs are dedicated to supporting coastal communities and promoting responsible use of the nation's ocean, coastal and Great Lakes resources through informed personal, policy and management decisions.

Approximately 95 percent of Sea Grant's federal funding goes to the state programs where it is used to conduct research, carry out extension and STEM (Science, Technology, Engineering and Math) education activities, and deliver valuable coastal resiliency services. Moreover, federal funding through the Sea Grant program has a significant leveraging impact with every two federal dollars invested attracting at least an additional dollar in non-federal, matching resources. Sea Grant enables coastal economic interests to develop and thrive, which supports the growth and development of our coastal economy.

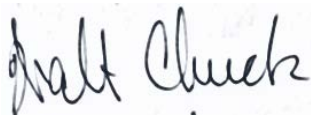

Oregon Sea Grant is part of this national network of programs and serves as a catalyst to promote discovery, understanding, and resilience for Oregon coastal communities and ecosystems. Oregon Sea Grant has been at the forefront of issues of critical interest to coastal communities, including: preparing coastal communities and local educators for the anticipated Cascadia Subduction Zone earthquake and tsunami; supporting research into ocean acidification impacts on oysters and other shellfish, and developing mitigation strategies; working closely with the fishing community to improve their access to and use of ocean condition forecasts; and collaborating with local community partners to support responsible coastal tourism.

Federal funding should continue for programs that deliver economic, environmental, and education benefits to our state and local decision makers. The Oregon Coastal Management Program and the Sea Grant program achieve this while also increasing our coastal communities' resiliency in a cost-effective manner.

Best Regards,

Jena Carter, Chair
Oregon Ocean Policy Council

Walter Chuck, Vice Chair
Oregon Ocean Policy Council
